

FULL-STACK DEVELOPER

PROFILE

Dedicated Full-Stack Developer with solid experience in building robust web applications using Django for backend development and Wagtail CMS for frontend content management. I also have strong proficiency in Laravel and the MERN stack (MongoDB, Express.js, React, Node.js), allowing me to select the most appropriate technologies based on project requirements. On the frontend side, I'm skilled in modern frameworks such as React, React Native, Vue.js, Quasar, and Svelte, enabling me to design dynamic, intuitive, and responsive user interfaces. With end-to-end expertise in both server-side and client-side development, I deliver high-performance, scalable, and user-centric solutions. Comfortable working with Agile and Scrum methodologies, I actively participate in sprints, reviews, and daily stand-ups to ensure continuous and iterative delivery. My commitment to continuous learning and staying up to date with emerging technologies ensures that every project I work on reflects current best practices.

EXPERIENCE

Front-End Mobile Developer – Match Point

August 2025 – December 2025

- Development of a cross-platform mobile application using React Native / Expo (iOS & Android).
- Integration of REST APIs for real-time data exchange.
- Implementation of features: image capture, upload, and processing.
- Management of navigation and state with React Navigation / Hooks.
- Configuration and deployment via EAS Build, App Store, and Google Play.
- Beta testing conducted using TestFlight and Google Play Internal Testing.
- Design of a responsive interface with reusable components.

Full Stack Developer – YANVSION

August 2023 – February 2025

- Worked as a Full Stack Developer, leading the development and maintenance of scalable web applications using Django (backend) and modern frontend frameworks like Vue.js, React, React Native and svelte .
- Built and maintained an internal CMS using Wagtail, streamlining documentation management across teams.
- Developed robust RESTful APIs with Django Rest Framework for a SaaS dashboard, ensuring seamless frontend-backend integration.
- Collaborated closely with UI/UX teams to create responsive, user-centric interfaces.
- Designed and optimized PostgreSQL databases, improving query performance and data integrity.
- Leveraged Docker for containerization and streamlined development environments.
- Managed version control with Git/GitHub, and implemented CI/CD pipelines using GitHub Actions.
- Enhanced frontend performance through strategic component optimization and code refactoring.

Content Moderator– MAJOREL

June 2018 – December 2021

- Responsible for moderating and reviewing user-generated content on various online platforms, such as social media, forums, and online marketplaces. Ensures user-posted content adheres to community standards and platform guidelines.
-

EDUCATION

Faculty of Science and Technology of Settat (FST)

September 2022– June 2023

Engineering degree in design and development of web and mobile applications.

Faculty of Letters and Human Sciences Casablanca

September 2016 – June 2019

Bachelor in English Cultural Studies, focusing on the analysis and interpretation of English language and literature in cultural contexts.

TECHNICAL SKILLS

- **Frontend** : React, Vue.js, React Native, Alpine.js, JavaScript (ES6), Tailwind CSS, Quasar, Svelte, Typescript
 - **Backend** : Python, PHP, Django, Wagtail CMS, Laravel, Django Rest Framework, Expressjs
 - **SEO, Tracking & Performance** : Google Analytics 4 (GA4), Google Tag Manager (GTM), Google Search Console,
 - **DevOps & Tools** : Docker, Git, GitHub Actions , VS Code, Postman, Environment management & deployment
 - **Database**: PostgreSQL, MySQL, NoSQL
-

CERTIFICATIONS

Training in web technologies: HTML, CSS, Bootstrap, JavaScript, React, Laravel and MySQL – **3W Academy**

Full Stack Bootcamp – Web and Mobile Development. Study Django, Vue.js and Docker – **Simplon.co**

PROJECT HIGHLIGHTS

Qera – Morocco

Role: Front-End Mobile Developer (React Native, TypeScript, EAS Build)

Developing and maintaining a cross-platform mobile application using React Native, TypeScript, and Expo EAS, focused on a smooth user interface, product scanning, and real-time comparison features.

- **Frontend** developed using React Native and TypeScript for a smooth, responsive, and high-performance mobile experience
- Implemented Axios for efficient communication between frontend and backend.
- Utilized React Context for managing application state and ensuring maintainable, scalable architecture.
- Delivered a cross-platform, user-friendly mobile solution that streamlined product scanning and comparison workflows.

ECI Digital Platform – Web & Mobile

Role: Full Stack Developer

Designed and developed the official digital platform for Enviro Consulting International (ECI), a sustainability-focused consulting firm. The project aimed to enhance digital visibility, accessibility, and communication through a modern, responsive, and scalable platform.

- **Backend**: Built using Django to ensure secure, efficient, and scalable operations.
- **CMS Integration**: Utilized Wagtail CMS for flexible and user-friendly content management.
- **Frontend** : Implemented a responsive UI for both web and mobile using modern web standards.
- Developed a mobile application as an extension of the web platform to provide global stakeholders with on-the-go access to ECI's tools and resources.
- Enabled seamless content updates, improved user engagement, and supported the organization's mission to promote sustainability through technology.

Afriprof – AI-Powered Educational Dashboard

Role: Full Stack Developer

Developed Afriprof, an AI-enhanced educational platform aimed at transforming digital learning across Uganda. The dashboard serves students, schools, and independent learners, offering personalized learning paths, centralized data, and performance analytics.

- **Backend**: Built with Django and containerized with Docker for scalability, security, and efficient deployment.
- **Frontend**: Created using Vue.js, offering a responsive and intuitive UI for seamless cross-device experiences.
- Key features include CRUD operations, advanced filtering, user-specific dashboards, and real-time analytics.
- Designed to support personalized learning, effective data management for institutions, and flexible self-paced education.
- Helped drive digital transformation in Uganda's education sector by providing data-driven insights and operational efficiency.
